Education and Certifications

- **B.Sc. Computer Science**, California State University, Long Beach
- **Food Handler Card**, Premier Food Safety 2023–2026
- **Courses:** Data Structures & Algorithms, Object-Oriented Programming, Database Management, Software Engineering

Technologies and Languages

- Languages: Python, SQL, C++, Swift
- Frameworks/Tools: MySQL, MongoDB, ExpressJS, ReactJS, NodeJS
- Technologies: Git, VS Code, Microsoft Office, Google Suite, Adobe Suite, Salesforce, Apple OS, Android

Projects

- **Capstone Project: Forum-Based Website** - A team project, similar to Reddit, where users can create an account and create posts on a public feed, make comments on posts, like a post, and change settings on their profile. I led the back-end development team of 2, utilizing the MERN stack and implemented user registration functionality, user login validation, and a real-time post and commenting function.
- **Personal Portfolio Website** - Designed a dynamic and phone-friendly website to display my skills and experience that uses a hamburger menu, clickable images, and an auto scroller for an easier user experience.
- **Spotify Data Visualization** - Using Spotify's API, I extracted data for the top 50 songs from different countries through Spotify's playlists and created charts and maps with the data to emphasize patterns and non obvious trends.

Interests

- I enjoy spending time with my dog, watching anime, and celebrating my friends' birthdays.
- I am currently learning Japanese on my free time
